RADOMONTE

RADOMONTE
- VENEZIA -

A Brand New Story To Tell.

Radomonte è un luxury brand italiano che firma rubinetteria di design, accessori e prodotti per il Wellness in acciaio inox.

Una visione che ha origine dalla trentennale esperienza nella produzione di rubinetteria di GEDA, casa madre del marchio, per dare forma a collezioni di prodotti di alta qualità che uniscono una artigianalità contemporanea a soluzioni tecnicamente innovative e rispettose dell'ambiente.

Il risultato, prodotti di design attenti ai più minuziosi dettagli, dove convivono una creatività ricercata e un fascino senza tempo.

Radomonte is an Italian luxury brand of designer mixers, accessories and products for Wellness made of stainless steel.

A vision that originates from the thirty years of experience in the production of mixers by GEDA, the parent company of the brand, to give shape to collections of high quality products that combine contemporary craftsmanship with technically innovative and environmentally friendly solutions.

The result are design products that have been studied up to the smallest detail, where refined creativity and timeless charm coexist.

Funzionalità. Design. Innovazione.

Le collezioni Radomonte nascono dall'esperienza e creatività di Stefano Macchion designer e fondatore del brand, che a partire da una raggiunta maturità di competenze dell'azienda nella produzione attraverso l'uso esclusivo dell'acciaio, ha voluto dare vita a un progetto che celebrasse la migliore qualità artigianale Made in Italy nel settore della rubinetteria di design.

Functionality. Design. Innovation.

Radomonte collections are born from the experience and creativity of Stefano Macchion – designer and founder of the brand – who, starting from the maturity of the company's skills in the production through the exclusive use of steel, wanted to give life to a project that celebrated the best of Made in Italy craftsmanship in the design tapware sector.

Design Is More

La ricerca creativa diventa un estremo atto di libertà. Il design dei prodotti Radomonte nasce da uno studio consapevole e attento dello stile che diventa poi atto di ribellione. Stravolgere le geometrie per giungere all'essenza della forma.

Ogni prodotto diventa la celebrazione di una storia e riesce a rendere la quotidianità una esperienza straordinaria.

Creative research becomes an extreme act of freedom. The design of Radomonte products comes from a conscious and careful study of style, which then becomes an act of rebellion. We twist the geometries to reach the essence of the shape.

Each product becomes the celebration of a story and manages to transform everyday life an extraordinary experience.

Solid With Charme

Tra le tendenze di design su cui si è concentrato negli ultimi anni il brand Radomonte c'è lo stile industriale, da cui hanno preso vita le collezioni Kàto e Kira.

Lo stile industriale nasce a metà degli anni Cinquanta quando gli architetti newyorkesi iniziarono a recuperare i magazzini e gli edifici industriali dismessi trasformandoli in abitazioni o atelier per artisti, come la celebre Factory di Andy Warhol.

La peculiarità di questi ambienti erano ampie superfici open space, in cui veniva mantenuta la struttura originale fatta di colonne, superfici materiche e tubature a vista.

Dallo stile industriale applicato al mondo del lusso nasce la corrente industrial chic, in cui l'iconica simbologia industriale si fonde con uno stile ricercato ed elegante. Il risultato sono ambienti in cui il rigore industrial si fa più morbido, dando vita ad atmosfere sofisticate e accoglienti. Per le personalità più eclettiche ed esigenti.

Among the design trends that Radomonte has focused on in recent years is the industrial style, from which the Kàto and Kira collections been created.

The industrial style was born in the mid-fifties when New York architects began to restore abandoned warehouses and industrial buildings, transforming them into homes or ateliers for artists, such as the famous Factory of Andy Warhol.

The peculiarity of these environments were large open spaces, in which the original structure made of columns, textured surfaces and exposed pipes was maintained.

The industrial chic trend is born from industrial style applied to the world of luxury, in which the iconic industrial symbolism blends with a refined and elegant style. The result can be seen in environments in which industrial rigor becomes softer, giving life to sophisticated and welcoming atmospheres. For the most eclectic and demanding personalities.

Hands Forging Beauty

Tutti i prodotti Radomonte sono realizzati esclusivamente in acciaio inox. Un materiale inerte, capace quindi di mantenersi inalterato nel tempo. La sua estrema resistenza superficiale lo protegge infatti dall'azione corrosiva di ruggine ed agenti esterni, garantendogli una durata eterna.

L'acciaio è una lega di ferro e carbonio che Radomonte usa nella variante AISI 316L, una variante dell'acciaio inox che, per il basso contenuto di carbonio, si caratterizza per essere ancora più resistente all'azione di sali e cloruri.

Radomonte products are made exclusively in stainless steel. An inert material, therefore able to remain unchanged over time. In fact, its extreme surface resistance protects it from the corrosive action of rust and external agents, guaranteeing an eternal duration.

Steel is an alloy of iron and carbon that Radomonte uses in the AISI 316L variant, a version of stainless steel which, due to its low carbon content, is characterized by being even more resistant to the action of salts and chlorides.

Le maniglie in vetro Radomonte sono realizzate in Vetro di Murano, secondo i metodi di lavorazione tradizionale dell'arte vetraria veneziana.

Ogni pezzo è realizzato artigianalmente e quindi unico.

Abbiamo scelto il vetro per le sue qualità ecologiche. Il vetro è atossico, perché composto solo da sostanze naturali. È resistente, igienico e riciclabile al 100%.

Per il suo riciclo, inoltre, necessita di temperature di fusione più basse con un conseguente risparmio energetico nella lavorazione.

Radomonte glass handles are made of Murano glass, according to the traditional processing methods of Venetian glass art.

Each piece is handcrafted and therefore unique.

We chose glass for its ecological qualities. Glass is non-toxic, because it is composed only of natural substances. It is resistant, hygienic and 100% recyclable.

Furthermore, for its recycling, it requires lower melting temperatures with consequent energy saving in processing.

Clearness And Tradition

Put On Some MakeUp

Le collezioni Radomonte sono realizzate in acciaio inox in finitura spazzolata o lucida.

L'acciaio spazzolato è disponibile anche in finitura PVD oro, bronzo, roseè e carbon. Il PVD (Physical Vapor Deposition) è un trattamento di qualità superiore che crea un sottilissimo film sulla superficie del prodotto, aumentandone la resistenza superficiale. Il trattamento PVD è una lavorazione biocompatibile, che non crea danni all'ambiente o alla salute delle persone.

Le maniglie in vetro di Murano della collezione Dorin sono disponibili nei colori ghiaccio o ambra.

Radomonte collections are made of stainless steel in brushed or polished finish.

Brushed steel is also available in gold, bronze, roseè and carbon PVD finishes. PVD (Physical Vapor Deposition) is a superior quality treatment that creates a very thin film on the surface of the product, increasing its resistance. PVD treatment is a biocompatible process, which does not cause damage to environment or to people's health.

The Murano glass handles of the Dorin collection are available in ice or amber colors.

Radomonte si impegna per una produzione nel rispetto dell'ambiente, sia nelle lavorazioni aziendali, garantite da un sistema di qualità e ambientale certificato, che a beneficio del cliente finale.

Nella progettazione dei prodotti Radomonte, oltre all'utilizzo di materiali ecologici e riciclabili come l'acciaio inox e il vetro, una attenzione particolare è data alle soluzioni per il risparmio energetico e il consumo intelligente.

Da questo è nato il marchio Eco Energy System, creato dall'azienda per certificare lo sviluppo e la realizzazione di progetti attraverso tecnologie e materiali mirati al rispetto e alla salvaguardia dell'ambiente.

Radomonte is committed to an environmentally friendly production, both in company processes, guaranteed by a certified quality and environmental system, and for the benefit of the end customer.

In the design of Radomonte products, in addition to the use of ecological and recyclable materials such as stainless steel and glass, particular attention is given to solutions for energy saving and intelligent consumption.

From this policy the Eco Energy System brand was born, created by the company to certify the development and implementation of projects through technologies and materials aimed at respecting and protecting the environment.

We Care About Tomorrow

The Bathroom Collection.

Collezione Bagno.

Scopri le collezioni di rubinetteria per il bagno firmate Radomonte. Prodotti Made in Italy di alta qualità, realizzati attraverso l'uso esclusivo dell'acciaio inox, resi unici da un design ricercato e da dettagli preziosi come il vetro di Murano. Un affascinante viaggio sospeso tra creatività e sentimento, per chi ama infondere di bellezza la vita quotidiana.

Discover the bathroom tapware collections by Radomonte. High quality Made in Italy products, made using exclusively of stainless steel, made unique by a refined design and precious details such as Murano glass. A fascinating journey suspended between creativity and feeling, for those who love to infuse with beauty their everyday life.

Mirò

Come pietre di un giardino zen le maniglie in vetro di Murano raccontano l'incontro tra Venezia e l'Oriente.
Un ricercato equilibrio tra lusso e minimalismo.

Like stones in a Zen garden, the Murano glass handles tell the story of the encounter between Venice and the East.
A refined balance between luxury and minimalism.
